# Appendix A. Supplementary Material

## A.1. Properties of Data

Table 5 shows the number of reviews per domain for the balanced dataset. Note that the data was downloaded up until July 2011, and there may be variations in the names of the categories between then and now.

### A.2. SSL

Figure 11 shows the attempt at combining the random and highest-margin selection methods, as discussed in section 6.

### A.3. Domain Adaptation

In Figures 5 to 8 we present the one-to-one adaptation in settings 1 and 3 (mixed training set), discussed in section 7. Figure 12 shows the percentage of 10 domains used in the 1-to-many SSL. Only the top 5 and least 5 frequent domains are shown. Note that since the industrial domain is the source domain, and it does not appear in the unlabeled set, it begins (and remains) at a 100%.

#### A.4. WSL

The results for the experiments discussed in section 8 are shown in figure 10. Example book reviews are shown in figure 9 (with grammar and spelling mistakes intact).

Domain	# of Reviews	Test Set Size
1. books	1,713,900	100,000
2. movies (Movies & TV)	555,208	10,000
3. elect (Electronics)	426,258	10,000
4. music	293,704	10,000
5. kindle (Kindle Store)	226,752	10,000
6. videos (Amazon Instant Videos)	138,228	10,000
7. kitchen (Kitchen & Dining)	133,740	10,000
8. health (Health & Personal Care)	107,336	10,000
9. mp3 (MP3 Downloads)	101,468	10,000
10. video_games	88,360	1,000
11. home (Home Improvement)	77,656	1,000
12. sports (Sports & Outdoors)	77,030	1,000
13. toys (Toys & Games)	76,388	1,000
14. garden_pets (Home, Garden & Pets)	72,542	1,000
15. clothing (Clothing & Accessories)	65,860	1,000
16. beauty	58,156	1,000
17. baby	56,994	1,000
18. camera (Camera & Photo)	46,228	1,000
19. food (Grocery & Gourmet Food)	45,270	1,000
20. software	40,954	1,000
21. shoes	36,986	1,000
22. cell_phones (Cell Phones & Accessories)	36,100	1,000
23. patio (Patio, Lawn & Garden)	33,194	1,000
24. office (Office Products)	17,958	1,000
25. auto (Automotive)	17,756	1,000
26. computer (Computer & Accessories)	14,544	1,000
27. watches	12,960	1,000
28. musical_inst (Musical Instruments)	9,254	1,000
29. android (Appstore for Android)	7,452	1,000
30. jewelry	7,026	1,000
31. magazine (Magazine Subscriptions)	4,902	100
32. arts (Arts, Crafts & Sewing)	4,084	100
33. industrial (Industrial & Scientific)	1,142	100
Total	4,605,454	

Table 5: Properties of the balanced data.

Figure 5: DA. left: Movies to Books. middle: Movies&Books to Books. right: Elect. to Books

Figure 6: DA. left: Elect.&Books to Books. middle: Books to Movies. right: Books&Movies to Movies

Figure 7: DA. left: Elect. to Movies. middle: Elect.&Movies to Movies. right: Movies to Elect.

Figure 8: DA. left: Movies&Elect to Elect. middle: Elect.&Movies to Movies. right: Movies to Elect.

excellent story i usually get my books from the library but this one was so good i wanted to get my own copy!!! excellent story!

great fiction There's nothing really scientific on this book. It's only a great fiction work really. Almost comic most of the Have that in time. mind when you read it!

poor sorry Barbara i usally love your books but this one is really poor. the ending is a mess there is no character developement no scene painting ... intreaging.

It is so horrible to

It's horrible!!!!

believe that this truely happens to children and their parents. wish I had read the book yrs. ago but thank the lord my children were okay.

Figure 9: Left to right: Example of true positive, false positive, true negative and false negative reviews labeled using the WSL rules.

Figure 10: WSL Error rate. top left: Books. top right: Movies. bottom left: Electronics. bottom right: Music.
